

Serigraph | In-Mold Label (IML)

Transform any surface into a smart, interactive interface with our 2D and 3D IML labels. These innovative printed materials replicate the look and texture of virtually any surface.

Challenge us with your target material, and our expert graphics team will craft a custom label that perfectly matches your vision.

Our printed constructions also allow for seamless backlighting, adding an extra layer of communication through light.

Key Features

- Decorate 1st or 2nd surfaces
- Combine with tooling textures to capture further realism
- Fully customizable for your brand and application
- Discover innovative label materials that enhance touch and feel
- Can be used to decorate 3D forms
- Dynamic backlit transformations

Next Steps

- Functional prototypes available
- Engineering support and guidance available
