

Serigraph | Membrane Switch

Bring smart functionality to life with our membrane switch technology.

Integrate electronic circuits directly into flexible overlays for sleek, responsive interfaces. With embossed labels and metal dome switches, our membrane switch technology offers reliable performance at a lower cost than traditional circuit boards.

Key Features

- Low capex expense vs traditional alternatives
- Customized to meet your product's requirements
- Add debossed or embossed features
- Custom shapes and knockouts
- Screen printed or laminated adhesives
- Dome switches or capacitive touch
- Integrate lighting, antennas, heaters, and more

Next Steps

- Functional prototypes available
- In-House Pre-Press Engineering Department
